Svetlin Slavchev

I am interested in website development using CMS systems like Sitefinity and Umbraco. Serverless programming and .Net Core are my newest passion and I am really excited to build new applications using these technologies.

PROJECTS

20+ Sitefinity projects

2014 - Present

During my past 10 years working with Sitefinity, I was involved in many different projects.

1 project with Sitefinity .net core Renderer

Most of all with MVC, some of them with Web.Forms

Many internal or external integrations

kulinarenblog.bg

Jul 2016 - Present

Web site for recipes and all kinds of delicious things. Build with Umbraco 7.5

shlaifane-bg.bg

Dec 2015 - Present

Web site for home and industrial cleaning – initially written in Umbraco 7, but in the summer of 2019 was migrated to serverless .net core application using AWS Lambda, S3, Cloud Formation, and Cloud Front.

Then the project was rewritten with Umbraco 8

softwaregroup.com
